Many of our partners have a shared drive or portal where staff can share their implementation ideas, custom resources, and lesson plans. You may wish to create a space where your staff can share this information, but it is not required.

We have provided our partners with over 100 lesson plans and resources to support the implementation of the program to meet district and school-wide goals. Your staff should be directed to our Support Centre for everything that they need myBlueprint-wise - and if they can't find what they are looking for, they can call and email us. We are happy to chat!
