

Pacific Rim School District

XXX: STUDENT ACCIDENT/INJURY PROCEDURES (P)

Approved: 90 12 04
Draft: 25 12 02

POLICY

The Board of Education recognizes that accidents may occur to students while they are under the care of the District. The board respects the right of the parent or guardians to determine medical attention for their children but recognizes that employees may from time to time be required to deal with emergent situations.

In cases where parents or guardians cannot be contacted readily and quickly, the Board expects its employees to exercise the degree of care and control as would be expected from a reasonably careful parent of a large family. The Admin Procedures to this policy are provided for the guidance of employees.
